

CM DB System

(College of Management Data Base System)

The College of Management

Agenda

1. Purpose of CM DB System
2. When to use it?
3. How to use it?

Purpose of CM DB System

1. To collect faculty basic information, academic and teaching performance, community service, and awards, etc.
2. To present faculty webpage on the website of the College of Management

When to use it?

- Whenever you would like to update your information, you can log in CM DB System
- Every April and November, the College will import data from NSYSU database. After we import the data, we will send email to our faculty to check and update the data

Homepage → Resource & Support → College Support → CM DB System

The screenshot shows the website's navigation structure. At the top, the university and college logos are displayed. A search bar and language options (中文, EN) are on the right. The main navigation menu includes 'About Us', 'Degree Programs', 'Faculty & Research', 'International relations', 'Alumni & Practice', and 'Resource & Support'. The 'Resource & Support' menu item is highlighted with a red box. Below it, the 'College Support' section contains a horizontal menu with 'Classroom Booking', 'Datastream', 'Bloomberg', 'TEJ-TESG', and 'CM DB System'. The 'CM DB System' item is also highlighted with a red box. A red arrow points from the 'CM DB System' link to a login overlay. The overlay contains the text 'Please enter your NSYSU SSO account and password' and '您好！請使用中山大學校園單一入口帳號登入'. It features input fields for 'Account' (with placeholder 'Enter account or email') and 'Password' (with placeholder 'Enter Password'), and a 'Submit' button. At the bottom left of the page, a link for 'College of Management Data Base System' is highlighted with a red box.

College Support

Classroom Booking Datastream Bloomberg TEJ-TESG **CM DB System**

The purpose of establishing the College of Management Data Base System (CM DB System) - Faculty Performance Indicators is to collect the most complete performance record of our faculty members so that the data can be used for the members' personal use, departmental performance statistics, and the presentation of international accreditation performance. The current database is imported from NSYSU's University Profile Indicator System (NSUSY Profile System).

Since the information in the NSYSU's Profile System is not the most comprehensive record of your academic research, please validate the data of your basic information and the following performance categories one by one when y

- Faculty Profile
- Journal Articles
- Conference Papers
- Projects
- Patents
- Intellectual Property and its Related Uses
- Books and Chapters
- Case Studies
- Online-Teaching Resources
- Thesis Advised
- Overseas Lectures

In the future, we will regularly import teachers' 12 forms each year, and another 9 for from teachers to fill out. You can fill out the forms at any time, but it is recommende the following year in order to pass it back to the university's database. We will impor the university's database so that the data (such as teacher evaluations) can be used departments and teachers in the College will not need to submit the data again.

Projects

Projects includes MOST (Ministry of Science Technology), MOE (Ministry of Education), and academia-industrial collaboration projects. The aforementioned projects are imported from the University database in every April. All you need to do is to check the correctness of the imported information and provide extra information in the fields marked with asterisk (*). However, you still can add any project you are working on to this database.

Click on “Edit” to check and provide information.
